Experts in Vein Care

Patient Education Solutions

- **Accurate Patient Education:** Healthcare providers are constantly educating and “reprogramming” patients that have received inaccurate and outdated medical information, which is costly and time consuming. Healthpoint provides interactive patient education *in the medical provider’s office* from source(s) that the provider chooses and trusts.
- **Time and Cost Effective Solution:** Healthpoint is more time efficient and cost effective than printed educational pamphlets that most healthcare providers offer in their waiting rooms. iKS ‘ system offers an interactive platform that eliminates office staff from having to manage materials for patient education.
- **Enhanced Patient Services:** By providing current and accurate medical information to patients waiting to see their healthcare provider not only enhances patients’ visits but also empowers them with factual medical information and heart health recipes endorsed by the American Heart Association.
- **Conserving Resources:** Sustainable Ad\$™ provides an efficient way for Healthcare providers to reduce their use of natural resources and waste streams while operation and growing their medical practice.
